

## Introduction

Polkadex Inc ("Polkadex") aims to provide more access to crypto and make the best efforts to list high-quality tokens. Therefore, token listing on Orderbook goes through rigorous due diligence.

Please make sure that you include all the information as mentioned in the form. Please also note that we require the project founder or CEO to fill out the form, as we need to speak to the key person of the project when we encounter any issues with the listing. Please wait patiently after applying as it needs to go through rigorous due diligence. To speed up the process, please be responsive and professional during the evaluation. Please ensure you are using <https://polkadex.trade/listing> for submitting your details and not through a third-party website or a mediator.

Please note that even though your project might not be listed now, we may reconsider your application in the future when we see improvements from your project.

**Who will contact you after applying?** Once you populate the form here (<https://polkadex.trade/listing>), you will receive an email confirmation with a ticket number; please keep the ticket number private with you.

If your project passes our initial review, a team member will be in touch. We will only contact you via [listing@polkadex.trade](mailto:listing@polkadex.trade) with your ticket number to discuss the next steps.

If you receive a communication purporting to be from Polkadex, as a first step, you can verify whether a contact you are speaking with is an official representative of Polkadex by cross-referencing the official email [listing@polkadex.trade](mailto:listing@polkadex.trade) and your ticket number.

**NB!** Please note that Polkadex does everything in its power and reasonably expected to prevent scammers and persons with bad intentions from acting on our behalf, however we can not completely rule it out. Polkadex is not liable for any negative consequences caused by such persons or any statement or manifestation made by them nor is (legally) bound be such.

## Important notes

- Polkadex's listing process is subject to a rigorous and thorough due diligence process. Our review team will ask additional questions. Contacting you does not guarantee your project will be listed;
- By submitting the form, you accept to keep confidential any and all information regarding Polkadex listing process, including but not limited to the fact that you have submitted the aforementioned form and any communication that follows.

- Project teams are forbidden from disclosing listing information until we issue our listing announcement;
- If someone claims to have “partnerships” or “listing agreements” with Polkadex, they are lying or violating their agreement with us, which renders them void.

**How do you evaluate projects?** There are no set requirements. We want reputed projects listed on Orderbook, such as projects with a proven team, a useful product, and a large user base.

- Apply for listing only if you have at least a minimum viable product, or your application will not pass our initial screening;
- You should focus on user adoption. You can include the user statistics in the application form to help with our screening;
- We evaluate how the team handles difficult situations, even if it is just within their own community;
- Do not try to pressure us into listing your coin by spreading FUD or negative comments about Polkadex, or you will be blacklisted;
- Please refrain from asking your community to over-aggressively shill your coin. It can hurt you in our evaluation process.
